EDUCATION

master

Saint-Petersburg State University of Economics, Saint-Petersburg

Thesis: "Economic and statistical analysis of energy efficiency in the regions of the Russian Federation"

2008 - 2013

PhD of economics

Peter the Great Saint-Petersburg Polytechnic University, Saint- Petersburg

Research topic: "Data Mining for the Probability Prediction of the Power Grid Facilities Outages"

SKILLS

Planning and Organization

- **Project Leadership:** Led over 5 projects, ensuring timelines and budgets were met while fostering team collaboration.
- **ERP System Planning:** Developed a detailed project plan for an ERP system, dividing work into 4 phases with key roles assigned to optimize workflow.
- **Backlog Management:** Maintained a backlog of 100+ tasks, prioritizing effectively using agile methodologies.
- **Technical Expertise:** Leveraged advanced skills in software development and systems integration for informed decision-making.
- **Stakeholder Engagement:** Engaged with stakeholders to align project goals with business objectives, facilitating open communication.
- **Data-Driven Insights:** Used analytics to track performance and improve processes, focusing on continuous learning and innovation.

WORK EXPERIENCE

Internship

01.2023 - 01.2024

GB Consult (developing data-driven solutions), Munich, remote

Responsibilities:

- Identify the business question (negotiations with customers)
- Collect, clean and analyze the data (development of hypotheses and models)
- Development of analytical reports based on the developed models

Head of Software Development

2018 - 01.2023

PJSC "Federal Testing Center" (PJSC ROSSETI - the largest electric power company in Russia), hybrid

Responsibilities:

- **Team Leadership:** Manage and mentor a team of 10 developers and analysts, fostering a collaborative and innovative environment to enhance team performance and skill development.
- **Agile Methodologies:** Apply Agile methodologies (Scrum/Kanban) to facilitate project planning and execution, ensuring iterative progress and timely delivery of milestones.
- **Roadmap Creation:** Develop and maintain detailed roadmaps and user stories for projects, aligning them with business objectives and stakeholder requirements to ensure clarity and focus.
- **System Development:** Design and implement systems and algorithms for efficient data export, ensuring data integrity and optimal performance while presenting insights to stakeholders in a user-friendly format.
- **Stakeholder Engagement:** Collaborate closely with stakeholders to gather requirements, provide updates, and ensure that project deliverables meet expectations and business needs.
- **Continuous Improvement:** Drive continuous improvement initiatives by analyzing project outcomes, identifying areas for enhancement, and implementing best practices to increase efficiency and effectiveness.
- **Risk Management:** Identify potential risks and develop mitigation strategies to ensure project success and maintain quality standards.

Achievements:

"Information system for determining imbalances in the distribution network, their interpretation and calculation of a probabilistic model of unaccounted or non-contractual consumption of electric energy (ISON)" forecasting system, machine learning algorithms (patent number [2021662181](#)) position: leader of the project
[developed and implemented machine learning models](#)

Data Analyst

2014 - 2018

PJSC "Rosseti Lenergo" (PJSC ROSSETI - the largest electric power company in Russia), on-site

Responsibilities:

- Created end-to-end data pipeline from data warehouse to BI report
